4-4 RCD Role in Water Quality Credit Trading Program – Brittany Heck

- Water quality credit trading is a way for point-source polluters such as dairies to comply with the Laguna Watershed's new TMDLs. Polluters can voluntarily do water quality improvement projects on other properties to offset their water quality impacts.
- RCDs in general have mostly acted as brokers for producers who want to trade credits. Sonoma RCD has gone beyond by leading the program administratively and by training verifiers. Gold Ridge will continue to work with Associate Director Bob Burke to decide what other role Gold Ridge would like to take.
